

Direct fired units (DFTO) are custom designed to accommodate unique application considerations. DFTOs may include either an externally mounted nozzle mix burner (shown) or an inline duct burner depending on parameters.

DIRECT FIRED THERMAL OXIDIZER

- Regulatory compliance with optimal capital cost
- Compatible with other energy-saving equipment such as waste heat boilers and heat exchangers
- Effective solution for small VOC stream treatment
- Allows efficient heat capture from high VOC streams
- Efficient for batch loaded processes as well as continuous.
