

DIRECT FIRED THERMAL OXIDIZER FOR ASPHALT APPLICATION

- Custom sizing
- Accommodate unique process requirements
- Tank fumes abated
- Railcar and truck loading treatment
- Combine with process converters to minimize fuel consumption
- Waste heat recovery to heat flux or maintain tanks
- Manage heat to avoid overheating plant/tanks
- Provide steam if/when needed
- Help prevent unwanted or unforeseen shutdowns due to blowstill off gas condensate/tar build-up
- Improved availability through experience
- Personnel protection and improved efficiency or fuel savings by minimal heat loss
