

- Fuel efficiency improvement
- Capacity Increase
- Up time & Operating interval improvements
- NOx emissions reduction
- Performance improvement for improved product
- Training schools and seminars
- Burner improvement, recommendations or replacement evaluation
- Return on investment

Services for your Oxidizer, Air Heater ^{or} Combustion System

NACAHTeCH

185 Stonewood Dr.
Bethel Park, PA 15102

NACAHTeCH

Service & Troubleshooting

We help customers keep their systems on line.

Avoid system outages and improve operating time with NacahTech. We analyze the system and provide the best recommendations for implementation and investment.

Many clients want to minimize operating costs. We are trained to find improved fuel efficiency, better burner operation or improved heat recovery. Some clients need **increased capacity, improved DRE's or lower NOx.** We join your team to make your system operate effectively in a timely manner.

Immediate response helps when clients are in a bind.

Training

Practical training for your personnel keeps your system reliable

Your technical personnel can continue to improve your performance with an understanding of basic fundamentals. Trainees learn to control combustion through the burners, control off gas introduction methods, reduce emissions, increase uptime and minimize maintenance.

Emergency Field Service & Troubleshooting

Free initial phone analysis

Losing production due to a combustion problem? NacahTech offers immediate response and service to correct the problem and bring the system back on line.

Troubleshooting analysis can make the corrections long-lasting.

Contacting NacahTech

Experience and understanding are available to you.

Please contact us for your current or future service needs. We are specialists in oxidizers, combustion systems and boiler operation, design and maintenance.

Offering exceptional service & value to the combustion industry since 1984.

No Call is too small!

NacahTech has a unique network of qualified professionals.

Experience the excellent service, training and difference that NacahTech provides. Our knowledge is your asset.

Improve....

- Plant **Reliability**
- **Optimize Steam Production** of waste heat boilers
- **Update control** for improved safety
- Air to Fuel ratio to **reduce fuel costs**

Industries Served

- Chemical
- Petro Chemical
- Asphalt
- Pulp & Paper
- Automotive
- Cement
- Power
- Off/Waste Gas Applications
- Carbon
- Ethanol
- Other Specialized Industries
