

**Burner Chamber as  
seen through viewport**

## **BURNER & COMBUSTION SYSTEMS**

**Process drying, heating, and  
various other applications**

- Custom sizing
- Ability to accommodate unique process requirements
- Accommodates low emission needs: CO and NOx
- Process heating temperatures as needed
- Waste fuel firing as needed
- Multiple fuels or single fuel
- High efficiency arrangement
- Proper burner type selection for efficiency and process consideration
- System designed to meet your available fuels: natural gas, low BTU gas, high BTU gas, liquids, etc.
- Single or multiple burners for best heat distribution
- Retrofits or new installations

*Top left:* Pre-piped and pre-wired skid mounted fuel train

*Top right:* Main control panel mounted in control room. Remote panels located as needed.

*Bottom left:* Blower and flexible connections
